

A close-up photograph of a beverage packaging machine. Several clear glass bottles with black caps are moving along a green conveyor belt. The machine is made of silver metal and has various mechanical parts, including a red component on the right. The background is a plain, light-colored wall.

ETTE

BEVERAGES

Refreshingly efficient packaging solutions

Save packaging of beverage cans
with high performance

Stable bottle handling for
high-quality spirits

A wide variety of packaging for different bottle types

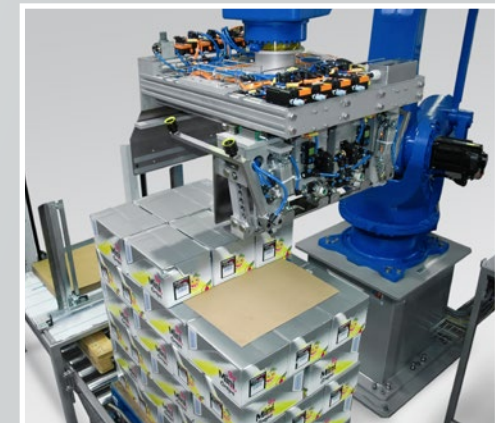

We also have the perfect solution for larger packages (here beer kegs)

First, **high-performance** is used to place the **small bottles** into the presentation boxes ...

...which are then packed into **outer cases**, ready to be **palletised**.

With our wide product range, we do not only have a suitable solution for your packaging task, but we also offer you flexible concepts for smaller outputs or even high-performance systems for your fast-moving items. With us, you are always with the best on the market. Test us!
