

Cartoner C 2155

**Packages all standard products
with maximum productivity
anywhere in the world.**

Extremely versatile and convincing

The Cartoner C 2155 belongs to the latest generation of intermittent cartoners. It offers convincing quality under ideal production conditions and when cartons of critical qualities have to be processed. In other words, it handles every shape and type of product with uniform, consistent perfection anywhere in the world. Intelligent components and features such as the rotary carton pick-up and accurate product insertion make sure of that. They make the Cartoner C 2155 a synonym for extremely flexible, highly productive and cost-efficient production.

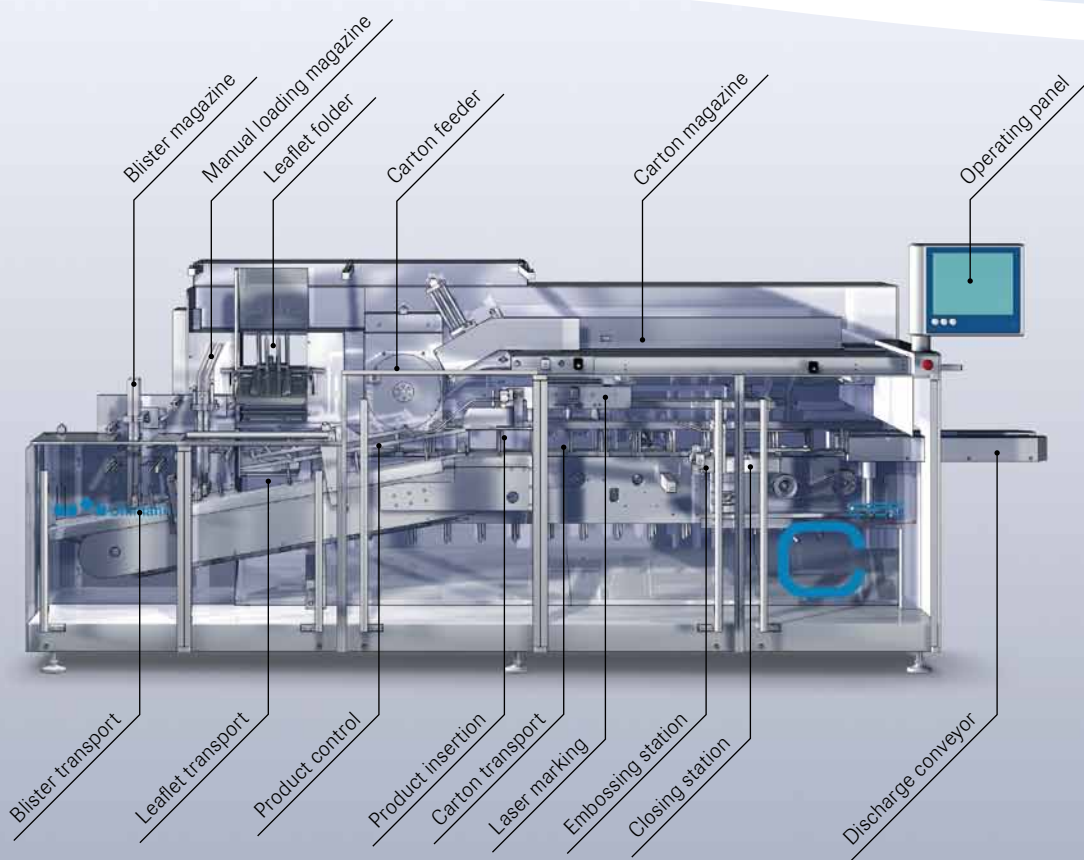

The Cartoner C 2155 is suitable for the pharmaceutical packaging of solids as well as liquids. It is ideal for bottles, vials, wallets and small plastic containers as well as blisters with ampoules or syringes, inhalers, bags and medical devices and is best suited to small and medium sized batches. Tailored accessories offering corresponding perfection are available for every application: from the appropriate feeding system through to diverse inline inspection and monitoring systems. The machine offers a large format area, optimum accessibility and is easy to operate and maintain.

Cartoner C 2155

The Cartoner C 2155 at a glance. Technical data:

Max. Output [1/min]	max. 150 cartons	Operating mode	intermittent
Pitch	140 mm	Types of closure	tuck-in and hot-melt
Carton size		Space required	
Width	30 - 115 mm	Machine width	approx. 1,450 mm
Height	15 - 90 mm	Machine height	approx. 1,600 mm
Length	63 - 170 mm	Machine length	approx. 3,600 mm
No. of blisters	max. 10	As bottle cartoner	
B blister stack height	max. 85 mm	Output [1/min]	max. 150 cartons
		Product size	min. 50 x ø 16 mm max. 145 x ø 60 mm

Cartoner C 2155

Components and features of the Cartoner C 2155

- Output of up to 150 cartons/minute
- Also suitable for bottles, vials, wallets, small plastic containers, etc.
- Rotary carton pick-up
- Servo-driven leaflet index and product insertion
- Various product feeding systems
- Different feeding systems for all common types of primary packaging with inclined or horizontal product transport
- Optional carton magazine for approximately 1,200 cartons
- Interchangeable closing station: easy changeover from tuck-in to hot-melt closure

Additional advantages of the Cartoner C 2155

- Central touch screen operation with 3-D visualization
- GMP-compliant machine design for straightforward cleaning and maximum pharmaceutical safety
- A maximum of 5 format parts ensures quick and easy format changeovers
- “Good product” philosophy: incorrectly filled cartons are rejected from the process
- Optimum accessibility for easy maintenance, cleaning, product and format changeovers
- Diverse configurations in line or at an angle
- Integration of separate production data acquisition system possible
- Predestined for line integration with the central line control system SCADA
